

## OUR SCHOOL, "EL CAMPITO"

I began to study English at El Campito in 1995.

The first time I crossed the huge door at "El Campito" I felt this place was magnificent, spacious and terrific. The floor between the creepers and the clods of earth were covered with stones. In this park, here and there I could see tall and short trees, all of them were dark or light green, brown, orange or yellow, and there were a lot of different plants and flowers.

I came here twice a week. Sometimes I was very tired because I then worked a lot but I felt fortunate and lucky to study here, to be here. To learn English was a goal for me.

Now, in 2022, I've come back to "El Campito School" and I'm not feeling tired. I'm happy to go on learning English. This park has a white precious rustic building where we can study different languages. It has a wonderful quiet garden, full of nature and peace; here we can meet classmates, different teachers and different subjects.

We are very fortunate to study in this wonderful place!
